Kathleen Salyer
Assistant Director, Superfund Division
California Site Cleanup Branch

Dear Ms. Salyer,

2003- Corrective Action Consent Agreement("CACA")

DTSC and Foss Plating entered into "CACA" to identify areas and chemicals of concern.

The following is a brief history of Foss Plating Company activities in compliance of our remediation obligations as part of the 2003 "CACA".

2004- Preliminary Endangerment Assessment

Workplan approved by DTSC to advance soil borings and sample to identify chemicals of concern

2006-Phase II Environmental Assessment

Winefield and Associates performed additional soil, groundwater and soil vapor sampling

2008- Permit-By-Rule Closure Plan Waste Water Treatment System("WWTS")

Waterstone Environmental Inc. performed "WWTS" chamber removal activities following approval by DTSC. No Further Action letter for the "WWTS" dated Jan. 18 2009

2010-2012 Groundwater Monitoring Well Installation Workplan

Astech Environmental Services prepares workplan, approved by DTSC Jan. 2012. Groundwater monitoring wells installation in 2012.

2013- Groundwater Monitoring Well Sampling Report

Astech Environmental Services preparing report, expected submission to DTSC by Mar. 2013

2013(Pending)-Omega Chemical Corporation Superfund Site, Operable Unit 2

Foss Plating Company is located on the boundary of "OU2" and expects an assessment as a financial contribution towards the Omega Chemical Corporation Superfund Site, Operable Unit 2. We hope to present additional new data in 2013 from our geologist' Well Sampling Report that should confirm that little contamination is attributable to this site.

We look forward to reaching a settlement with both the EPA/Omega and DTSC regarding Foss Plating Company and would welcome the EPA's opinion on meeting our environmental obligations.

Sincerely,

Randall A. Foss

Foss Plating Company
